A stacked bar chart titled 'U.S. should take more action to reduce global warming' showing the percentage of respondents who agree with this statement, broken down by year (2014, 2015, 2016) and age group (18-29, 30-49, 50-69, 70+). The y-axis represents the percentage from 0 to 100. The x-axis lists the years. Each bar is stacked by age group, with 18-29 at the bottom and 70+ at the top. The data shows that younger age groups consistently support more action, with the 18-29 group reaching 100% in 2016. Support for more action generally decreased over time for all age groups.

Year	18-29	30-49	50-69	70+
2014	75	68	58	45
2015	70	62	52	40
2016	100	68	55	25

2019	68	21.6
2018	4.85%	2018 13.50%
2019		
2020		
2020		
20.86	7,432.79	5.16%
